

Single & multi-dose containers + contract filling

For over-the-counter, cosmetics, pharmaceutical and veterinary applications

LF of America®

LF of America is your turn-key partner for innovative single and multi-dose injection-molded containers, with the added capability for contract filling of your non-sterile products.

Overview

LF of America, a subsidiary of Lameplast, SpA, a Tekni-Plex business, fills, packages and distributes unique unit-dose and multi-dose containers. Its products offer precise dosing, ease-of-use and personalization options.

Compared to traditional blow/fill/seal containers LF of America's injection molded vials provide customers with a more attractive physical appearance, flexible closure design reclosability and printing capabilities. Additional capabilities include:

- Injection molding of unit-dose vials in an ISO 7 cleanroom and ISO 9001 and ISO 13485 certified facility
- Contract filling of non-sterile, over-the-counter and personal care products, in an ISO 8 cleanroom. Filling is done in an ISO 22716 certified and FDA and EPA registered facility. (Will also fill third-party containers.)
- Custom molding capabilities to meet customer's requirements and specifications

Custom solution packaging

Single and multi-dose packaging solutions

Single & multi-dose containers + contract filling

For over-the-counter, cosmetics, pharmaceutical and veterinary applications

LF of America®

LF of America container types:

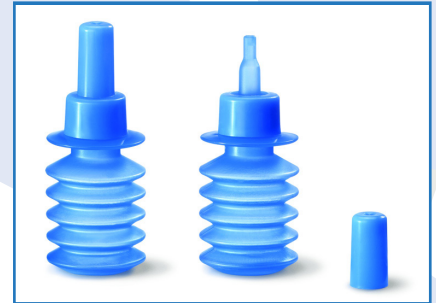

Unit-dose delivery systems

- 0.3ml to 10ml capacity
- PE, LDPE, LLDPE, HDPE, PP plastics and EVOH barrier
- Recloseable option for multiple use of same vial
- Calibrated drops ensure consistent delivery of pharmaceutical drugs
- Uses include ophthalmic, oral vaccines, injectables, buffer solutions and nutritional supplements

Powder applicators

- Bellow bottles made from medical-grade plastic
- Delivery system for hemostatic powders
- 3ml and 9ml capacity with customization options

Dual-chamber bottles

- For the reconstitution of powdered drugs
- Packaging keeps the powder and the liquid separated until point of use
- A polyethylene membrane prevents the risk of contamination by foil particles

Dropper bottles

- Calibrated droppers at 0.03, 0.04 and 0.05ml
- Larger orifice options at 1mm and 1.5mm for gel products
- Tamper-evident seal
